PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience building React.js and Next.js frontend applications integrated with Node.js and Express.js backend services, for fintech, telecom, and SaaS platforms. Delivered measurable performance gains, including up to 40% fewer network calls through GraphQL API consolidation and 15–30% faster load times through frontend optimization and efficient state management. Hands-on experience building and integrating AI agents (LangChain, OpenAI function calling) for automated, multi-step workflows, alongside secure authentication (JWT, OAuth2, AES-256), cloud deployment (AWS EC2/S3/CloudFront, Azure App Service), CI/CD automation (Docker, GitHub Actions), and Agile cross-functional delivery.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Redux, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Ant Design, Material UI
- **Backend:** Node.js, Express.js, RESTful APIs, GraphQL, MongoDB
- **Agentic AI:** LangChain, OpenAI Function Calling, Multi-Agent Workflows, Prompt Engineering, OpenAI API
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront, IAM), Azure App Service, Docker, CI/CD (GitHub Actions, Jenkins)
- **Authentication & Security:** JWT, OAuth2, AES-256 Encryption, Role-Based Access Control
- **Tools & Practices:** Git, GitHub, Postman, Agile/Scrum, Microservices Architecture, WebSockets
- **Soft Skills:** Team Collaboration, Mentorship, Problem-Solving, Cross-Functional Communication

WORK EXPERIENCE

Frontend Developer | *Vcare (Telecom & Payment Domain), Noida* Oct 2025 – Present

- Developing scalable React.js frontend applications for telecom and VoIP-based platforms serving real-time usage data.
- Integrating telecom and payment APIs, handling real-time data rendering across customer-facing dashboards.
- Collaborating with backend and business teams to translate requirements into responsive, high-performance UI.

Full Stack Developer | *Microhub Technology, Noida* Dec 2024 – Oct 2025

- Built and enhanced frontend applications using React.js and modern JavaScript for telecom and service-based platforms.
- Translated business requirements into functional UI components, integrating REST APIs and optimizing frontend performance.
- Contributed to solution design in cross-functional team discussions, supporting full delivery lifecycle from requirements to deployment.

React Developer | *PayPanda, Noida* Jun 2024 – Nov 2024

- Developed fintech dashboards using React.js and Redux for payment systems including AEPS, DMT, and wallet services.
- Integrated APIs for real-time transaction data, improving UI performance and overall user experience.
- Collaborated with cross-functional teams in an Agile environment to deliver payment platform features on schedule.

React Developer | *Tech Aura Private Limited, Noida* Apr 2022 – Jun 2024

- Built reusable UI components using React.js, HTML, CSS, and JavaScript for CRM and telecom-based applications.
- Implemented responsive, user-friendly designs and collaborated with backend teams on API integration.
- Enhanced application usability and performance across mobile, tablet, and desktop devices.

PROJECTS

OnePip — Trading & Investment Platform

React.js, Node.js, MongoDB, Redux, Ant Design, REST APIs, WebSockets, AWS EC2, Docker

- Consolidated portfolio, watchlist, and real-time market data into single GraphQL queries, reducing network calls by 40%.
- Built GraphQL subscriptions with WebSockets to deliver millisecond-level live price updates.
- Implemented biometric (fingerprint) authentication with encrypted data storage for secure trading access.
- Deployed backend to AWS EC2 using Docker; configured CI/CD pipelines for rapid, reliable feature delivery.

Client Averti System

React.js, Spring Boot, Docker, Google Calendar API, JWT, PDF Generation API

- Built a secure JWT-based client authentication system with role-based access to financial and health records.
- Synchronized client tasks and appointments with Google Calendar for real-time scheduling across the platform.
- Developed financial-record and health-checkup tracking modules with PDF report generation for clients.
- Added multimedia recording/upload features enabling clients to save or email audio and video messages.

Averti System
React.js, PHP (Laravel), GraphQL, Google Calendar API, PDF Generation, Material UI
- Designed a unified GraphQL API layer to serve calendar, task, and reporting data through a single access point.
- Built a responsive dashboard with Google Calendar sync and automated PDF reporting modules.
- Created role-based task management with priority levels, deadlines, and automated email alerts.

Pay Panda Admin Portal
React.js, Node.js, Redux, Ant Design, REST APIs, MongoDB, GraphQL
- Built a role-based admin portal from scratch with OAuth2 authentication, reducing page load time by 15%.
- Integrated multi-bank AEPS/DMT payment systems and mobile/DTH recharge utility services.
- Used GraphQL mutations to update service access rules and manage distributor assignments in a single API call.
- Created role-based, session-secured dashboards for Retailers, Distributors, and Super Distributors.

PAY Panda — All Payment Solution
React.js, Node.js, REST APIs, Ant Design, GraphQL, Docker, GitHub Actions
- Built the frontend from scratch with AES-256 encryption and JWT-secured authentication.
- Unified transaction history, wallet balance, and service list into a single GraphQL query, cutting redundant network calls.
- Deployed services to Azure App Service using Docker with CI/CD pipelines via GitHub Actions.
- Developed role-based dashboards for Retailers, Distributors, and Super Distributors.

Credo Mobile
Next.js, Redux, JavaScript, REST APIs, HTML, CSS
- Built responsive, scalable UI components for telecom billing and account management dashboards.
- Integrated REST APIs for user data, invoices, and real-time usage tracking, using Redux for state management.

Midco — Telecom & Internet Platform
Next.js, JavaScript, Tailwind CSS, REST APIs
- Developed customer-facing dashboards for internet usage, subscription plans, and billing across all device sizes.
- Integrated subscription, billing, and usage-analytics APIs while reducing UI load time through optimized rendering.

Trump Mobile
React.js, Redux, JavaScript, REST APIs
- Built UI for mobile plan selection, recharge, and onboarding flows with reusable, scalable components.
- Integrated plan-listing, authentication, and recharge-processing APIs with real-time payment status updates.

Ride-share Matrix
HTML, CSS, JavaScript, PHP, REST APIs, GraphQL, Bootstrap
- Built CRM panels for trip, driver, and payment management, integrated with a Laravel backend for real-time trip data.
- Designed data tables and search interfaces for efficient trip tracking and dispatch.

SkillGenix — AI-Powered E-Learning Platform
React.js, Nest.js, AWS, OpenAI API, Agentic AI Workflows
- Integrated the OpenAI API and agentic workflows to auto-generate personalized learning content and adaptive suggestions based on user progress.
- Designed multi-step, tool-calling agent logic to sequence content generation, progress evaluation, and recommendation steps automatically.
- Designed a responsive UI with optimized CSS architecture and built REST APIs for course and user management.

EDUCATION

B.Tech | Rajkiya Engineering College Aug 2017 – Aug 2021

CERTIFICATIONS (IN PROGRESS / RECOMMENDED)

- AWS Certified Developer – Associate (in progress) — add once scheduled or completed.

- Meta React Developer Professional Certificate (optional, strengthens React specialization claim).

ACHIEVEMENTS

- Reduced network calls by 40% on a trading platform by consolidating REST calls into unified GraphQL queries.
- Cut admin portal load time by 15% through frontend rendering and API-handling optimizations.
- Mentored junior developers on React component design and API integration best practices.
